EXPERIENCE

IBM

November 2024 – Present

Software Developer – Full Time

- Contributing as a core developer across two enterprise-scale products in parallel, including one actively evolving build, working across React Native, TypeScript, and Java Spring Boot REST APIs for iOS and web.
- Designed and built REST APIs using Java and Spring Boot, integrating 15+ services to power core application features and enable seamless frontend-backend communication.
- Mentored three team members through technical knowledge-sharing sessions on React, Redux, API integration, project architecture, and debugging.
- Partnered with designers using Figma to translate UI/UX mockups into pixel-perfect, accessible interfaces, improving usability and design consistency.
- Leveraged Generative AI tools to accelerate code generation, documentation, and testing workflows, improving development efficiency by 30–40%.

Krishi Hrudaya – Full Stack Developer

February 2024 – April 2024

Freelance

- Developed cart functionality using React.js and Tailwind CSS, integrating with a MySQL backend via REST API for seamless item addition in a real-world e-commerce project.
- Integrated PhonePe for payments and Fast2SMS for phone number verification, enhancing user experience and security on the platform.

PROJECTS

AI Knowledge Hub | *React, TypeScript, Redux Toolkit, Node.js, Express.js, PostgreSQL, LangChain, Vector DB, OpenAI API*

- Building a full-stack RAG-based knowledge assistant that lets users upload PDFs, DOCX, and PPT files and query them in natural language, with answers grounded strictly in the uploaded content.
- Architecting the system with JWT-authenticated REST APIs, PostgreSQL for metadata storage, and a vector database (Pinecone/ChromaDB) for embedding-based semantic search, using LangChain and the OpenAI API for retrieval-augmented answer generation; deployed via Vercel and Render.

Kryptozone | *Blockchain, HTML, CSS, JavaScript, React.js, Solidity, Git* - [Link](#)

- Designed and implemented a platform enabling customers to purchase items using Ethereum coins, ensuring safe and secure decentralized transactions with 100% error-free version-controlled codebase.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Java, C++, C, HTML5, CSS3

Frontend Development: React.js, React Native, Redux Toolkit, React Router, Responsive Web Design, Component-Based Architecture

Backend & API Development: Java, Spring Boot, REST APIs, API Integration, JSON, Asynchronous Programming (Promises, Async/Await)

Testing: Jest, React Testing Library, Unit Testing, Test Case Development

Databases: SQL

Cloud & AI: Azure AI Fundamentals (AI-900), IBM Generative AI Developer, IBM Consulting Agentic AI Foundations, IBM watsonx, Prompt Engineering

Tools & Platforms: Git, GitHub, Azure DevOps, Postman, npm, VS Code, Kubernetes, Figma, Jira, Confluence

Development Practices: Agile & Scrum, Debugging, Code Reviews, Version Control, SDLC

ACHIEVEMENTS

- Secured National level Rank of 20 in Amity Hackathon; solved 250+ DSA problems on various coding platforms (5 Star Coder in C++ and Problem-Solving).
- Vice President of REVA Hackathon Club — orchestrated the university's Annual Hackathon event, attracting 1500+ participants and generating a 40% increase in sponsor revenue.

EDUCATION

REVA University, Bangalore, India

December 2020 – November 2024

B.Tech in Electronics and Communication Engineering — CGPA: 9.01
